

DISTINGUISHED LECTURE in BIOLOGICAL ENGINEERING

“Title to be advised ”

Monday – February 6th , 2017 – 12:15 p.m.

EPFL – room SV1717

Prof. Xiaoliang Sunny Xie

Mallinckrodt Professor of Chemistry and Chemical Biology,, Department of Chemistry and Chemical Biology, Harvard University, Cambridge, (USA)

host: Prof. David Suter

Abstract:

To be advised

Recent Research Interestes:

Single molecule enzymology

Molecular interactions, conformational dynamics, and underlying mechanisms of macromolecule machines

Gene expression in living cells

Nonlinear optical imaging and biomedical applications

Single cell genomics

Sandwiches will be provided

See current Bioengineering seminar calendar at <http://bioengineering.epfl.ch/seminars>
