

Akshay Nagarajan

Team lead – Mechanical design and manufacturing, AMMACHI Labs

Amrita Vishwa Vidyapeetham

<http://www.amrita.edu/ammachi/>

Akshay Nagarajan is a researcher at Ammachhi Labs, the robotics and computer human interaction research center at Amrita University. He has a keen interest in haptics, technology enhanced learning and human motor skill development that has been the main theme in much of the work he has worked on. He has a bachelors degree in instrumentation and has spent his last six years designing haptic simulators for vocational skill training and assessment.

Research Associate, Simulation development team, Ammachi Labs

Unnikrishnan R is a software engineer at Ammachi Labs. He has a Masters degree in Computer Applications and has been developing medical rehabilitation training systems and visuo-haptics simulators at Ammachi labs for the past four years. He is interested in exploring human motor control, learning psychology & A.I to develop intelligent tutoring systems for motor & cognitive skill development. He is fascinated by the intersection of technology, art and music and is an advocate for spreading the maker culture in India.
