

Generative AI in banking

A workshop with the Pictet Group

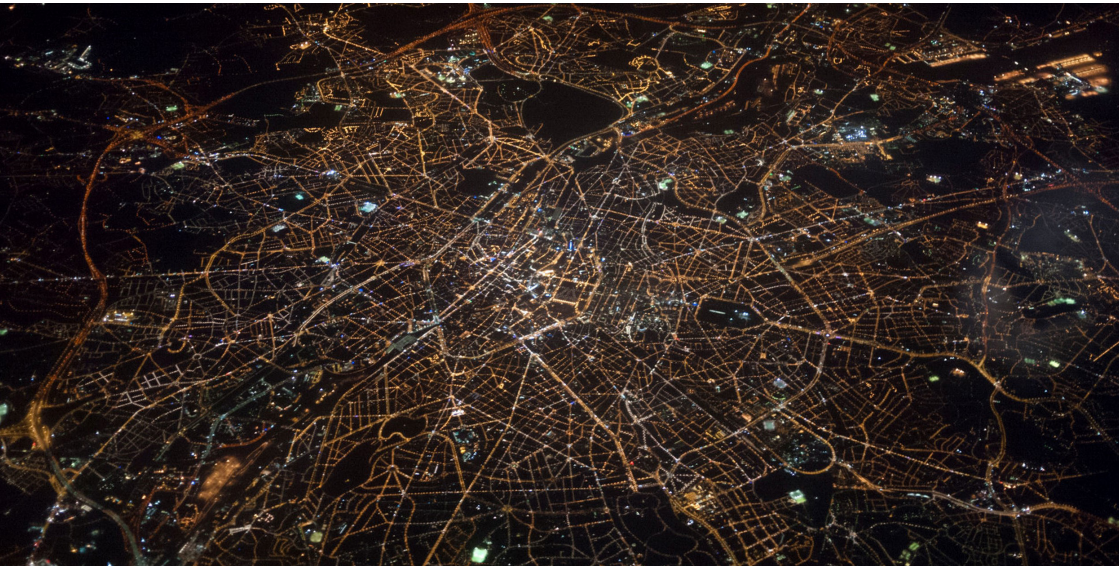

24 SEPTEMBER 2024, 4.15 PM - 7PM, AT EPFL

Join us for an immersive workshop with Pictet, the second largest financial group in Switzerland.

You'll discover how generative AI is shaping the future of banking. Gain valuable insights into real-world use cases while engaging with field experts working at the intersection of finance and artificial intelligence.

The workshop is open to students in computer or data science-related fields, and we also encourage other students with a particular expertise in this domain to register.

A networking session with drinks will follow the workshop. We look forward to meeting you there!

SPEAKERS

Steve Blanchet – Head of Group
Technology Strategy & Innovation

Philip Yazdani – Technology Strategy
& Innovation Manager

KEY INFORMATION

- Two-hour workshop + one-hour networking session with drinks
- Laptop required
- MA and PhD students
