

# SUSTAINABLE FOOD SYSTEMS

## ENTREPRENEURIAL SUMMER SCHOOL

Learn more at <http://bit.ly/eit2019>

### Why you should join!

The 'Sustainable Food Systems' Summer School aims to address current and future sustainability challenges of the food system. Participants will take on a production, consumption, and socio-economic angle to tackle issues such as environmental footprint, biodiversity, and food waste. The Entrepreneurship Summer School encourages citizens - university students, PhD/Post-Doc candidates, young professionals, from interdisciplinary backgrounds - to create, evaluate, and implement their ideas for a sustainable food system.

**Join a network of innovators:** Get in contact with motivated students from all over Europe, who are passionate about entrepreneurship, innovation and changing our food system for the better.

**Learn to innovate:** Split into interdisciplinary teams you will learn methodological skills in ideation, business creation, and product development to create idea concepts.

**Pitch and advance your ideas:** Learn how to discuss and evaluate your ideas in a structured way. Pitch your best idea to experts and founders.

**Get to know Haifa and Munich:** Get a faceted intercultural experience in both Haifa, Israel and Munich, Germany. Accommodation and transport from Haifa to Munich included!

### Key Benefits

The EIT Food Summer School takes an entrepreneurial approach to tackle future challenges.

#### Ideate

Team up with students and professionals from diverse backgrounds and identify the most pressing pain points in Europe's food system.

#### Prototype

Apply the Design Sprint methodology and develop minimum viable products to test your idea.

#### Impact

Take an entrepreneurial approach to tackle current issues of Europe's food systems to maximize the impact of your ideas.
