INFORMATION FOR MENTEES

The women-in-physics career symposium is at the same time the kick-off event for an associated mentoring network. Mentees are female physicists who are either graduate students or postdocs. Through the mentoring network they will be able to meet with their associated mentor at least four times to discuss questions concerning their career with their experienced mentor. At the event mentors and mentees will be matched. At this inaugural event, 20 spots for mentees are available. For sign up mentees should provide a short CV and a short motivation (200 words) why they want to participate. In case you are not selected as a mentee you may still participate in the event as regular participant. Please also provide a list (up to three) of favorite mentors that you would like to be connected with. A growing list of mentors can be found on the event webpage.
